

SURAJ KUMAR

Innovative web developer skilled in C, HTML, PHP, Java, and MySQL. Experienced in leading projects and teams during hackathons. Looking for a challenging role to utilize my web development, leadership, and project management skills.

WORK EXPERIENCE

Front-end Developer (Get Interact)

August 2022

Siksha 'O' Anushandhan, Bhubaneswar

- Developed and tested the Get Interact platform for educational communication.
- Used HTML, CSS, and JavaScript to build a scalable frontend infrastructure.
- Created visually appealing designs for the platform using Canva to enhance usability.

Team Leader, Hackathon Project

January 2023

MLRIT University, Hyderabad

- Led a team to develop an APK using HTML and CSS at a Hackathon.
- Contributed significantly to project ideation, development, and implementation.
- Presented the project clearly, articulating its value and technical details to judges and stakeholders.

PROJECTS

IBM - Play School Educational based gaming Website

- Created an educational gaming website to enhance students' learning through interactive games.
- Included various educational games (history, math, science, geography) that refresh with each page load. [View Website](#)

Suraj Kumar - Portfolio Website

- Created a responsive portfolio website to highlight my skills, projects, and background.
- The website features a dynamic hero section with image sliders and interactive elements to boost user engagement. [View Website](#)

Suraj Mega Mall – E-commerce Website

- Developed a fully functional and responsive e-commerce website that enhances the shopping experience for users.
- The platform includes essential features for browsing, managing a cart, and completing transactions. [View Website](#)

User Registration and Login Panel - PHP

- Built a secure user registration and login system using PHP and MySQL.

Voting System Using PHP

- Integrated user authentication, real-time voting updates, and secure data handling.

Get Interact (Code4Odisha at SOA)

- Created a communication platform for educational purposes.

Student and Teacher Support Platform (Inventron at MLRIT)

- Created a platform for students to express academic concerns, seek advice, and trade books and instruments.
- A platform for students to provide feedback to teachers while ensuring privacy.

Software Development Intern

- Completed a challenging internship at Codsoft, focusing on software development methodologies.

Front-End Development Intern

- Completed a front-end development internship at Cognifyz, specializing in responsive and user-friendly interfaces.

CAREER GOALS

I aim to grow as a web developer by engaging in innovative projects, continuously learning new technologies, and enhancing my skills. I aspire to take on leadership roles to guide teams and make a positive impact through my work.
